Paul Henry Benjamin Alonte III

Senior Frontend Engineer · AI-Assisted Development

Berlin, Germany · +49 152 31410054 · paulalonte@gmail.com · paulalonte.github.io · linkedin.com/in/paulalonte

PROFILE

Senior Frontend Engineer with 15+ years of experience building scalable, accessible web applications with React, Next.js, TypeScript and Angular. Strong in frontend architecture, design systems and performance, with a track record of modernising legacy codebases and turning UI/UX designs into production-ready products. Works AI-first day to day — using Claude, AI coding agents and the Model Context Protocol (MCP) to speed up delivery, automate workflows and raise code quality — and brings that same mindset to building the next generation of AI-powered user experiences.

CORE SKILLS

AI Engineering	Claude, AI coding agents, Model Context Protocol (MCP), AI-assisted development, workflow automation
Frontend	React, Next.js, TypeScript, JavaScript, Angular, HTML5, CSS/SCSS, Material UI, Bootstrap
Real-time & Data	TanStack Query, Redux, RTK Query, Redux Saga, RxJS, WebSockets, WebRTC, REST APIs
Architecture	Modular frontend architecture, design systems, Figma design tokens, performance optimisation
Quality	Cypress, end-to-end testing, accessibility (WCAG, screen reader & keyboard), code review
UI/UX	UI/UX design, wireframing, prototyping, information architecture
Backend	Node.js, Express.js, Ruby on Rails, MongoDB

EXPERIENCE

Senior Frontend Engineer — Feb 2022 – Present

Labforward · Berlin, Germany

- Lead improvements to the frontend architecture of an IoT software platform, focusing on scalability, modularity and long-term maintainability.
- Improve performance through lazy loading, code splitting and optimised rendering, and responsiveness across devices.
- Drive accessibility improvements toward WCAG compliance as part of a broader UX quality effort.
- Modernise legacy components and upgrade React, TypeScript and supporting libraries to keep the codebase maintainable.
- Connect the design system to code by syncing Figma design tokens to GitHub.
- Build real-time features with WebSockets and WebRTC; write end-to-end tests in Cypress.
- Leading an AI-assisted refactor of the entire application with Claude: migrating data fetching to TanStack Query, removing Redux Saga, and rebuilding the interface with Material UI.
- Use Claude daily as part of an AI-assisted development workflow, from implementing features and refactoring to generating and maintaining Cypress end-to-end tests.

Stack: React, TypeScript, Material UI, TanStack Query, Redux, RTK Query, WebSockets, WebRTC, Cypress, Figma tokens, Claude

Application Engineer, Frontend — Jul 2021 – Dec 2021

e-bot7 (conversational AI platform) · Munich, Germany

- Built user-facing features and new functionality for managing the company's chatbot platform.
- Improved existing user flows, built reusable components and optimised client-side performance.
- Ensured the technical feasibility of UI/UX designs in close collaboration with design.

Principal Software Engineer
Nov 2019 – Jun 2021

Deltek · Makati, Philippines

- Drove development of People Planner, a project and resource planning product.
- Built the Angular/TypeScript frontend integrated with a C#/.NET backend.
- Owned development and quality assurance across teams in the Philippines and Denmark, covering analysis, design, coding and testing.

UI/UX Developer
Jun 2017 – Nov 2019

Willis Towers Watson · BGC, Philippines

- Owned all UI code for application development, including UI architecture and introducing SCSS for maintainability.
- Defined and enforced UI standards and reviewed UI code before deployment.
- Implemented web accessibility for screen-reader and keyboard users.

Technical Consultant
Jul 2015 – May 2017

Oracle + NetSuite · Makati, Philippines

- Led style guides and UI code development to standardise design and layout.
- Delivered e-commerce and ERP projects end to end, from kickoff to go-live, working directly with onshore clients on requirements and UI.

Programmer Analyst
Sep 2013 – Jun 2015

Cognizant · Makati, Philippines

- Google-certified rich media developer on the Google account: YouTube mastheads, mobile in-app, interactive in-stream and Google Display Network lightbox units (JavaScript, HTML5, CSS3, Canvas, animation).

Frontend / Flash Developer
Feb 2010 – Aug 2013

Movent · BGC, Philippines

- Built interactive web applications for desktop, mobile and tablet, including Facebook games and mobile augmented-reality apps, from concept to go-live.

Brands delivered for: Samsung, Intel, Warner Bros, L'Oréal, Wyeth, Samsonite, Axe, Mentos, Garnier, Del Monte, Lipton, Dove, Medicol, Ayala Land, Globe, Pond's, Marlboro

EDUCATION

BS Information Technology
Informatics Computer Institute · 2001 – 2003

Health and Science Education (Associate)
OLGC Polymedic · 2003 – 2005

CERTIFICATES

Web Development Bootcamp (2023)
SuiteCommerce Developer
Google Rich Media Developer

LANGUAGES

English, Filipino
